stolen last Saturday night from the residence of Mr. Tilford on South Market. The matter was immediately after the theft was discovered placed in the hands of McMahan. It developed that during the past week a woman has been going over the city inquiring for a sister who had left the east, at others asking to give instructions in crochet work. This woman, the detectives readily saw was the tool of two men whom they knew were here. She would go into a residence, take it in at a glance and the information thus obtained she would impart to her confederates. She had been at Mr. Tilford's. Saturday evening he went over to a neighbor's and Mrs. Tilford, who was sick, retired to her room, leaving her rings in a case upon the

During the exciting days of the great and unequaled boom time, people, who were inclined to sneer at Wichita's aspiration to become a manufacturing center, declared with much more venom than judgment, that she could never introduce any line of manufacturing successfully, have been compelled by the undeniable evidences of a solid manufacturing city to acknowledge that they were mistaken, to say the least.

Not only has Wichita successfully inaugurated numerous lines of manufacturing, which were loudly proclaimed to be impracticable, but she has also succeeded in drawing to herself some establishments, which flourish better in Wichita than they could in any other section, for the very plain reason that they are adapted partic

ularly to this section of the country.

It must be borne in mind that the figures here quoted for both years, 1887 and 1888, are the sworn statements made by the manufacturers themselves, for the purpose of assessment, and hence they are in neither case at all exaggerated. Indeed, if there were any discrepancy whatever, it would tend to lower, rather than raise the figures furnished to such an unsought taking figures obtained by the same pertwo different years, ratio of gain for Wichita's manufacturing

"Unscrupulous Advertisers."

WHEN WE ADVERTISE we mean just what when we advertise we mean just what we say. When we quote a price the public can always depend on the correctness of the ad. When we advertised this past week Organus Lawns at JUST HALF PRICE (71-2 cents per yard) we meant that we would offer best quality Organdie Lawn at 71-2 cents, usually so d at 15 cents. When we offered all our let Linen Lawns at 15 cents, sold heretofore at 30 and 40 cents, we meant it and the public were sure of getting just what we advertised. We refer to these items for the purpose of calling the attention of the public to the fact pose of calling the attention of the public to the fact that some very DECEPT VE and M SLEADING that some very DECEPTIVE and M SLEADING ADVERTISEMENTS are put in the paper simply to DRAW CUSTOMERS to the store but only to find the ad DECEPTIVE and UNTRUE. A deceptive ad from one store is usually construed to mean that a l advertisements are untrue. We think however, that a discriminating public ought to seperate the true from the untrue and shun every store caught advertising a class of goods not on hand or a quality of goods that were never on
